

POLAND - SLOVAKIA

What's with this Earth?

AN ERASMUS+
YOUTH PROJECT

PARTNERS:

Fundacja Inspiracja
Folklorny Subor Ondalik

About us

"What's with this Earth?" is a project which can help people gain new knowledge, improve their language skills and meet new people. It is funded by the European Union's Erasmus+ Program. During the project, people learn from each other and get to know new opportunities. We also learn about new forms of education such as non-formal and informal education.

Our Team

PL

The Polish group are kids aged 13 to 15 from the private school 'Inspiracja' in Warsaw. This is a huge advantage for us to be here because this is our first trip with Erasmus. But we had very fun time here and we improve our English skills .

SK

We are a youth from the children's Folklore Ensemble Ondalik. We come from Slovakia from the village of Diapalovce. The choreographer and leader of the ensemble is Ing. Martin Tesko. The ensemble has existed since 2015 .

Goals & Objectives

Our objective is to save planet Earth by educating other people about ecological behaviors and how impactful they are for the planet. Besides that, our goal is also integration between students from different countries and letting them acquire more knowledge.

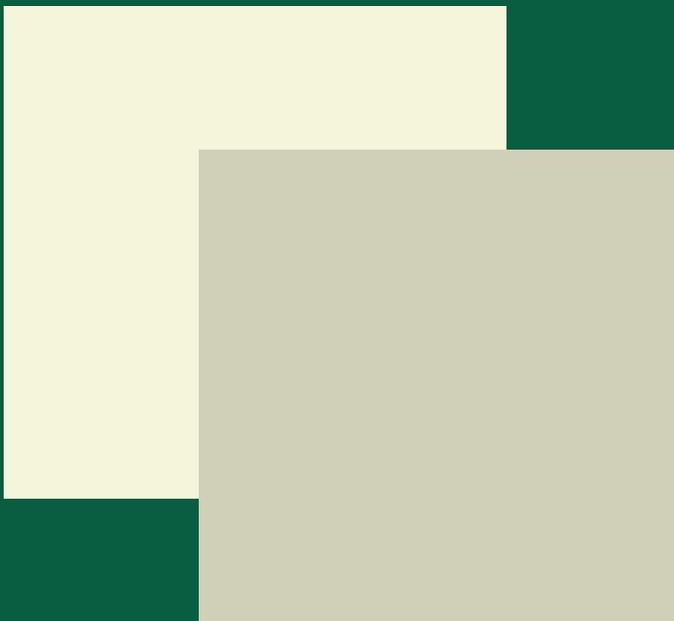

Statistics

- Percentage of electricity production from wind more than doubled in the time from 2005 (8%) to 2016(16.7%) in Europe.
- Only 13% of the world recycles trash.
- The great pacific garbage patch (the biggest garbage pile in the world) is 1.6 million kilometers square which is 15% of europe or 16% of the USA.

Our tips

To be more ECO

1. Separate your rubbish
2. Save water
3. Support eco-organisations
4. Use reusable bags
5. Teach about ecology
6. Shop responsibly

final thoughts

In this week long summer camp we have done a lot of activities and learnt a ton. For example we've:

- Visited a mountaineer who taught us the history of the Murzasichle village as well as showing us 17th century mountaineer clothing,
- Learnt about types of people in projects and how being extroverted or introverted impacts,

- Climbed at the top of Kopa Konradzka mountain which is 2005 meters tall,

- Had fun and recreation in Chochołowskie thermal baths,

- Visited Zakopane in which we had a city game and we interviewed passers-by about level of their ecology and the ecology around them,
- Taught each other traditional dances from our countries

In summary, both Polish and Slovakian sides learnt some general knowledge and a ton about each other's cultures while having fun doing it.
